

AIRCRAFT APU & CHARGER

MADE IN THE U.S.A FOR OVER 30 YEARS

25 Amp

Designed to supply filtered DC bus power through standard APU receptacle in private and commercial aircraft. Models for 25 or 50 amps are available for operating avionics and flight control systems when the master switch is activated. Can also charge the battery through the plug at a 10 amp rate. Output is current limited, and will withstand starting loads. Voltage is limited to prevent battery overcharging.

DC Current and voltage are displayed on panel meters.

14 volt models available with Piper Plug

50 Amp

Quality: 100% copper transformer heavy duty rectifiers, and a **3 year warranty.**
